

Removing 1997-2003 Pontiac Grand Prix GT Back Seat

A quick guide on how to take the back seat out of your Grand Prix.

Written By: Scratchitory

INTRODUCTION

There are a few reasons to want to take out your backseat:

- Clean under it.
- Put in a new seat.
- To reach the rear speakers.

And this is a short and easy guide on how to remove the seat. Anyone can do it.

Step 1 — Back Seat

- **Underneath the back seat on both sides will be either a tab or a lever (In mine, it has tabs)**

Step 2

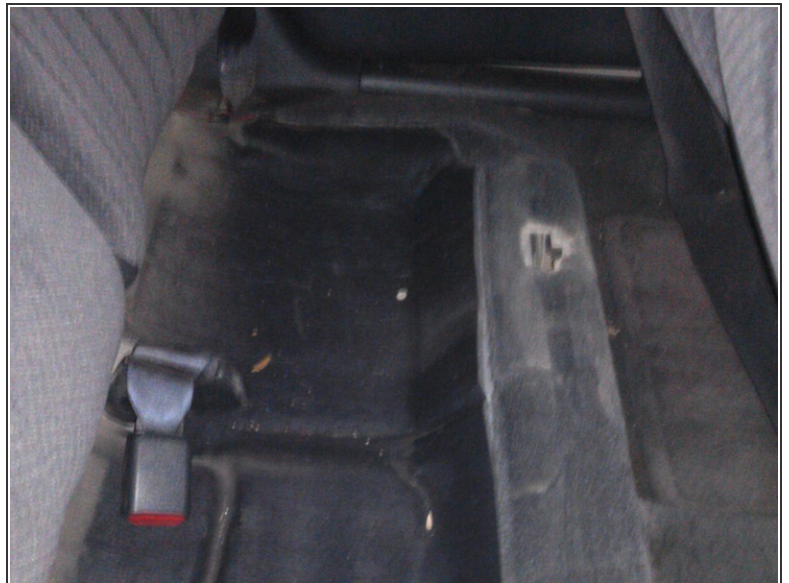

- **Pull/lift the tab/lever on each side to release the seat.**

Step 3

- Lift up and remove the seat.

Step 4

- Clean the seat or do whatever it is you wish to do.

Step 5

- **Put the seat back on.**

- As shown in the first image, be sure to put the seat belt and buckles through the slit on the seat. Otherwise, you will be without seat belts in the back.
 - As shown in the second image is a hook that goes into the base of the backseat.
 - The third image is of the tab that the hook on the seat goes into.
- i** When you line up the hooks and tabs, push down **hard**. You will hear a click when the hooks are fitted into the tabs.
- ***And there, your seat has been taken out and put back in! Good job!***

Your seat has now been taken out and put back in. Not hard, eh?
